

SCALEXTRIC RACING

Take your place on the start finish line and get ready for your racing adventure to begin.

Our six car Scalextric is digitally controlled and comes with a race screen to display race position and lap times. The track was designed to make sure we could provide an exciting race with twists, turns, overtaking opportunities and even a pit lane!

Races can be simple with set laps or more complex include qualifying for track position and then a race. We can even add in compulsory fuel stops in the pit lane to make things realistic and really exciting.

RACE OPTIONS

- **Ten Lap Race** – complete ten laps of the track and see what position you cross the finish line in.
- **Time Trial** – Set a number of laps and when the race is complete the winner is the one with the quickest lap time not the first over the finish line.
- **Qualifying and Race** – Qualify your grid position before the race begins, can you get pole position for the start of the race?

GAME SPECIFICATION
